### **SUPPLEMENTAL EXAMINER'S AMENDMENT**

1. This communication is in response a query on 25 April 2007. The Notice of Allowance mailed, 12 April 2007, failed to include dependent claims 41-44. Dependent claims 41-44 are allowed based on their dependency. Claim 42 is amended in this Examiner's Amendment.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Heintz (Registration No. 41,828) on 28 August 2007.

The application has been amended as follows:

Cancel claims **28** and **30**

Amend Claim **42** to state "The system of claim 20, wherein  $k$  is 1.96."

### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance:

The prior art publication, *Comprehensive Asset/Liability Management: More Than Just a Model* (hereinafter McGuire) teaches a method for obtaining better information on core deposits (page 5, paragraph 4). McGuire teaches a method for assessing core-deposit behavior using

Art Unit: 3691

empirically established mathematical relationships to explain the simultaneous behavior of total balances, rates paid, and retained balances (page 5, last paragraph). Explanatory variables in this approach are lagged balances and rate values, market rate inputs, trend and seasonal factors, and independent economic influences such as unemployment. The estimated relationships are used to define forecast equations that predict average life and rate-balance sensitivity, in addition to other facets of core deposit behavior (page 5, last paragraph).

The prior art, Madden, U.S. Patent 6,363,360 teaches a system and method for analyzing and originating a contractual option arrangement for transacting a deposit liabilities base of a financial institution at predetermined prices and time periods (Abstract). Madden further teaches obtaining an option to sell the deposit liabilities base to a third party at a predetermined price, comprising the steps of: analyzing external market data, and internal data pertaining to the financial institution, and inputting the external market data and the internal data to the computer system; calculating an estimated market value or a range of such values for the deposit liabilities base; generating a minimum potential bid price or a range of such prices for the deposit liabilities base; and incorporating the generated bid price or the range of such prices into the deposit liability option contract, wherein the contractual documents specify the price or range of prices which the third party will pay during a predetermined term for the deposit liabilities; whereby the value of the deposit liabilities base may be quantified without the requirement of divesting, the deposit liabilities base from the financial institution (column 8, lines 9-32). Madden teaches assumptions, including the estimated useful life of deposit base (column 7, line 50 thru column 8, line 8).

The prior art of record fails to teach a method for determining a useful life of balance sheet items, comprising the steps of:

(A) receiving data for each of a plurality of balance sheet items, the data including a sample of account balances, a size of the sample being  $n = 4k^2s^2/d^2$  wherein  $s$  is an estimated yearly retention rate,  $d$  is in the range of 0.01 to 0.03 and  $k$  corresponds to a level of significance;

(B) performing, in a computerized system, a dynamic calculation of a first retention rate for each of a plurality of balance sheet items using the data received in step (A);

(C) performing, in the computerized system, a steady-state calculation of a second retention rate for the plurality of balance sheet items using the data received in step (A);

(D) combining said first and second retention rate to determine a predicted useful life of the combined plurality of balance sheet items.

These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. For this reason claim 1 is deemed allowable over the prior art. Independent claims 19, 20 and 38 are substantially similar to claim 1 and are therefore allowed for similar reasons to that of claim 1. Claims 2-4, 8, 10-17, 21-23, 25, 27, 29, 31-37 and 41-44 are allowed for their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
